DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16 and 22-25, drawn to a subject matter of image compression employing lossless compression, classified in class 382, subclass 244.
 - II. Claims 17-21, drawn to subject matter of image decompression, classified in class 382, subclass 282.

-The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in single combination. The subcombinations are distinct from each other if they are shown to separately usable. In this case, invention II has separate utilities such as decompressing raw CT scan digital projection data. Such separate utilities are not utilized in invention I. See M.P.E.P. §806.05(d).

-Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
